Winter Pop Collage Social Card for Illustrator

For the holiday season, we'd like to send out a set of social media layouts that have both the space for an image to be placed (i.e. in a photo frame or polaroid) or a nice text treatment to write a holiday greeting. The objects included in this set should resolve around bright colors, winter imagery, and interesting type treatments. The text greeting should be "Happy Holidays" with a line of editable lorem ipsum in a font from Adobe Font's limited library collection to improve user experience for trial users (see https://fonts.adobe.com/fonts/?library=basic).

The set should contain 2 posts (1080 x 1080 px) and 4 stories (1080 x 1920 px).
